

## CONCLUSION (TO STUDENTS)

The Disaster First Aid techniques introduced in the previous chapters are based on medical procedures used and followed by licensed, certified and trained personnel around the world.

The main points of all patient care are as follows:

- Rescuer safety is the main priority.
- Do no further harm.
- Treat patients with respect and courtesy.
- Do not neglect rescuer needs treating patients.
- Be gentle but firm.
- Be kind.
- Be humble.

The intention of the preceding document was to not instruct the students in all the skills of first aid. The intention was to build upon your existing skills and knowledge and enhance basic first aid techniques already learned.

As volunteer rescuers, each and every one of you must be commended. Without your time, efforts and dedication this manual, as well as this training, would be ineffectual at best and hopeless at worst.

Understand that as members of a Disaster Response Team or Program, you have made a commitment to assist and provide care to your fellow humans in their time of need. Others like you are doing the very same thing for their communities as well.

We are all working to improve patient survivability and lessen the impact a major event will have on our society in general.

Together:

- We can be prepared.
- We can be compassionate.
- We can be caring.
- We can be involved.
- We can make a difference.

Thank you for your efforts!

## INSTRUCTOR CONCLUSION

Hopefully you made it this far in the short four hours of class instruction. If so, then you have performed a valuable service in providing important information and techniques to your students to allow them the opportunity to assist others in a disaster situation.

I hope you enjoyed the structure of this training program. In addition, I hope that your interaction with your students and other instructors was positive as well as beneficial to you.

Finally, let me thank you again for your dedication, time, and personal sacrifice in delivering this training program.

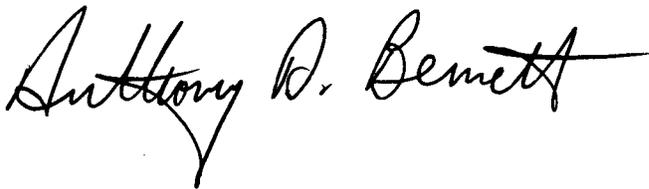

If I can provide you with any assistance in delivering this class, please do not hesitate to call or e-mail me. Please inform me of both criticisms and praises as they pertain to the program as a whole or for any particular part by itself.
